

# TIME FOR INTEROPERABILITY

---

How civic tech solutions integrate  
to engage citizens at scale

*June 2025*

The Association Civic Tech Europe (ACTE) was founded in December 2019 to represent civic techs at the European level.

Civic tech actors are independent of any political or economic movement and rely on technological innovations to strengthen citizens' participation in democracy and forge new links between voters and institutions.

# EUROPEAN CIVIC TECH ECOSYSTEM

Engaging the wider public  
in political processes

**Citizen Participation**

Supporting facilitation of  
offline Deliberations

**Deliberation Support**

Enabling easier access to  
institutional information

**Access to Institutions**

**ACOTE** ASSOCIATION  
CIVIC TECH  
EUROPE

Further activities in  
the ecosystem

**Other Actors**

**Campaign Management**

Supporting organisations  
to run their campaigns  
online and offline

**Monitoring**

Tracking and analysing  
online content

## ACTE MEMBERS

STATELESS

# **A****TE** **COLLABORATION**

We help institutions to empower citizens and  
respond to the crisis of democracy.

Great diversity of actors

Significant pool of skills

Work in Silos?!

Interoperability

## Interoperability

**Citizen Engagement is never about one single tool.**

**It is about the goods tools used at the proper moment and at the good scale.**

**In practise, Civic Tech tools are interoperable.**

**Low entry  
barriers**

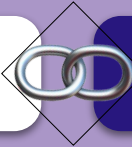

**Massive online  
participation**

**Specialised on  
large-scale engagement**

**Simplicity**

## EXAMPLE 1 Mini & Maxi Public

**MAKE.  
ORG**

**Open

Politics**

**decidim**

**Combined strengths  
between 2 tools**

**Technical integration via widget**

**Strong collaboration  
between tech teams**

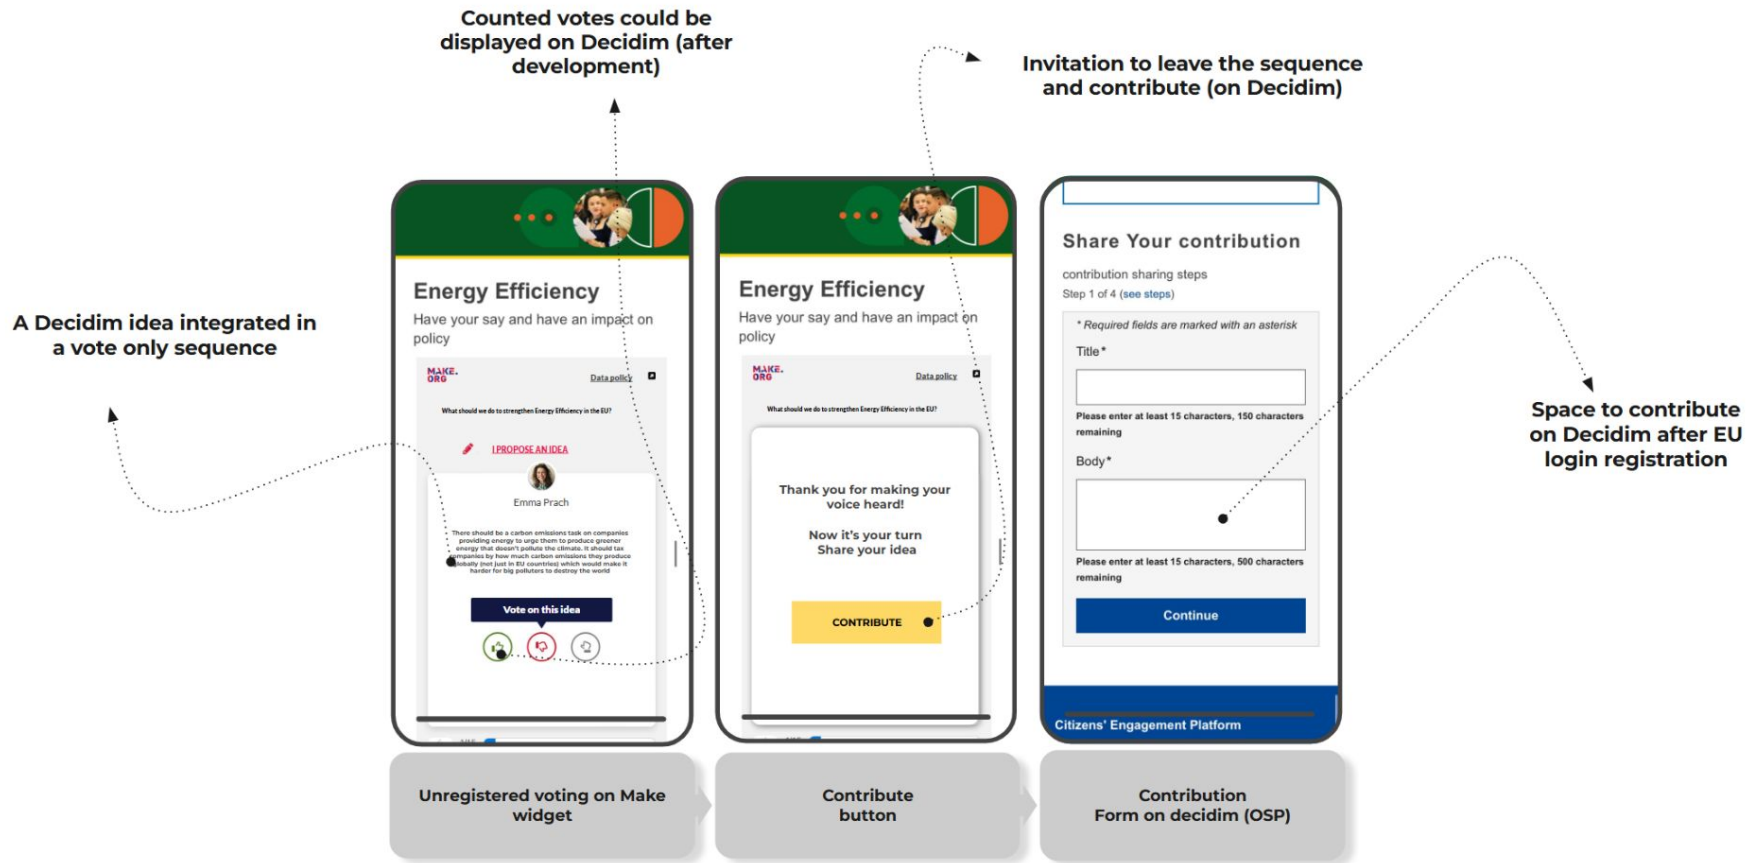

**Bringing many people on board**

**Providing option to  
provide more depth**

**Modularity**

**wide range of multilingual  
participatory processes**

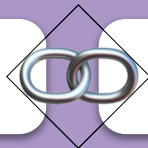

**10 features**

## EXAMPLE 2

# BLENDED ENGAGEMENT

go  
vocal  
Primary  
CitizenLab

Combines the power of  
**Online & Offline**

- ★ Learning & collaborating teams
- ★ Market Leader + Start-Up
- ★ Best of quantitative and qualitative

Used by 500 cities

Built for large orgs and efficient  
internal collaboration

AI sensemaking to  
understand diversity of  
opinions

Participation hub with  
full toolbox

In-person dialogue:  
Capture the full stories

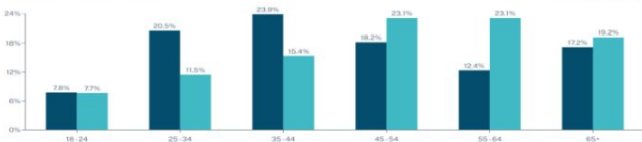

(Live) Transcription  
& (AI) Analysis

Rapid feedback & iteration  
within a session

Verified ideas &  
suggestions

# Vision for blended engagement

Total population

**Inclusive participation:**  
Complementing online with  
offline for  
representativeness

**Title**  
Outdoor library for all

**Description**  
In less than 250 words, tell us what your idea is about. We recommend you start with an introductory/summary paragraph, before getting into the details. Don't forget to share why this is so important to you and the overall community.

Why don't we think of parks as spaces to work, to read, etc. I want to propose the creation of an outdoor library, ideally with real paper books to borrow as well.

**you think you could contribute with for photos**

**Approve**

**Blended data repository:**  
Combining textual and  
voice-based inputs in one  
place

AI summary ✨

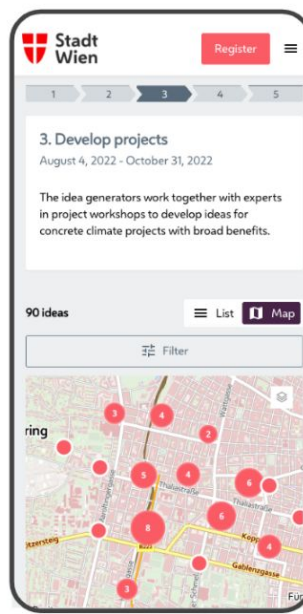

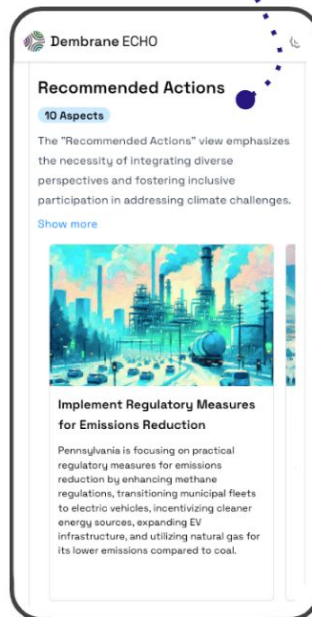

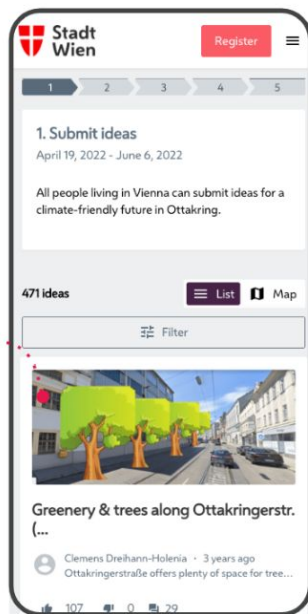

Respondents frequently emphasized the need for enhanced fitness and recreational facilities, with suggestions for an Olympic-sized running track ■, a calisthenics fitness park ■, and an open outdoor fitness park ■. The desire for more sports amenities was also evident, with calls for basketball courts ■, ■ and a skate park ■.

There was significant interest in integrating technology and workspaces into the park, with multiple mentions of providing free Wi-Fi and charging outlets ■, ■, as well as urban modular benches for working and relaxing ■.

**AI sensemaking:**  
Integrating audio snippets  
for storytelling

# Example project

Ideas serve as starting point to in-person workshops

Recommendations from Dembrane get pushed into Go Vocal's "blended input repository"
